

## Cisco Unified IP Phone Expansion Module 7915

Cisco® Unified Communications is a comprehensive IP communications system of voice, video, data, and mobility products and applications. It enables more effective, more secure, more personal communications that directly affect both sales and profitability. It brings people together by enabling a new way of communicating — where your business moves with you, security is everywhere, and information is always available...whenever and wherever it is needed. Cisco Unified Communications is part of an integrated solution that includes network infrastructure, security, mobility, network-management products, lifecycle services, flexible deployment and outsourced management options, end-user and partner financing packages, and third-party communications applications.

The power of the Cisco Unified Communications family of products extends throughout the enterprise by delivering powerful, converged voice solutions with the new Cisco Unified IP Phone Expansion Module 7915 extending capabilities to wideband audio phones (Figure 1).

**Figure 1.** Cisco Unified IP Phone Expansion Module 7915

### Product Overview

Call coverage is a critical capability for administrative assistants and others who must monitor, manage, and cover the status of calls. This capability requires the ability to instantly determine the status of numerous lines beyond the six-line capability of the Cisco Unified IP Phone 7962G and 7965G models and eight-line capability of the Cisco Unified IP Phone 7975G.

The Cisco Unified IP Phone Expansion Module 7915 extends the capabilities of the Cisco Unified IP Phone 7962G, 7965G, and 7975G models with additional buttons and an LCD display. With this expansion module, you add 12 physical keys with access to 12 additional keys through the page keys for a total of 24 buttons to the existing six buttons of the Cisco Unified IP Phone 7962G

(Figure 2) and 7965G models and the existing 8 buttons of the Cisco Unified IP Phone 7975G. You can use up to two Cisco Unified IP Phone Expansion Module 7915 modules (Figure 3) with the Cisco Unified IP Phone 7962G, 7965G, and 7975G models.

**Figure 2.** Cisco Unified IP Phone 7962G with One Cisco Unified IP Phone Expansion Module 7915

**Figure 3.** Cisco Unified IP Phone 7962G with Two Cisco Unified IP Phone Expansion Module 7915 Modules

### Features and Benefits

The large LCD display of the Cisco Unified IP Phone Expansion Module 7915 allows for quick and easy identification of associated buttons. Using the Settings menu of the Cisco Unified IP Phone 7962G, 7965G, and 7975G models, you can adjust the contrast of the individual LCDs for these phones and the Cisco Unified IP Phone Expansion Module 7915 according to your preference. You can program the buttons on each Cisco Unified IP Phone Expansion Module 7915 as a directory number, line key, or speed-dial key, much like on the Cisco Unified IP Phone 7962G, 7965G, and 7975G models. Buttons used as a directory-number (DN) or shared line keys are illuminated, allowing easy identification of call state (Table 1).

**Table 1.** Illuminated Buttons

Button	Line Status
Off (dark)	Line available
Green, steady	Line in use
Red, steady	Line in use by someone else
Amber, flashing	Line ringing
Green, flashing	Call is on hold

These capabilities provide features that are similar to typical Direct Station Selection/Busy Lamp Field (DSS/BLF) modules but are not intended to be directly comperable to traditional DSS/BLF modules. The Cisco Unified IP Phone Expansion Module 7915 is not an operator or attendant console. The primary function of this module is to provide the Cisco Unified IP Phone 7962G, 7965G, and 7975G models with additional keys for features such as speed dial or directory numbers. The illuminated buttons provide ease of line status, making the Cisco Unified IP Phone Expansion Module 7915 an ideal call-coverage tool.

The two illuminated page buttons beneath the display of the Cisco Unified IP Phone Expansion Module 7915 allow you to shift between the first and second pages of 12 buttons, providing access to all 24 keys, 12 at a time (Table 2). Table 3 lists the features of the Cisco Unified IP Phone Expansion Module 7915.

**Table 2.** Illuminated Page Buttons

Button	Page Status
Off (dark)	Page not in focus
Green, steady	Page in focus
Amber, flashing	Page not in focus with one or more alerting or on-hold calls present on page

**Table 3.** Features and Description

Feature	Description
Graphical display	4.3", high-resolution (480 x 272), graphical monochrome 4-bit grayscale display. The display also supports localization requiring double-byte Unicode encoding for fonts.
Directory-number and feature buttons	The module has 12 physical buttons (24 with page key).
Page buttons	The two Page buttons are used to access each page of 12 buttons and provide status.

## Software Requirements

Table 4 lists the software requirements for the Cisco Unified IP Phone Expansion Module 7915.

**Table 4.** Cisco Unified IP Phone Expansion Module 7915 Software Requirements

Specification	Description
Phone software requirements	8.3(5) and later
Call-control compatibility	Cisco Unified Communications Manager 4.2(3) SR3a, 4.3(2), 5.1(3)b, 6.1(1), and later; Cisco Unified Communications Manager Express 4.1, 4.2, 4.3, and later
Signaling protocols	Skinny Client Control Protocol (SCCP) and Cisco IP Phone 7962G, 7965G, and 7975G Software 8.4(1) and later)

The Cisco Unified IP Phone Expansion Module 7915 allows for 48 additional buttons (with two modules), but the number of buttons depends on the Cisco Unified Communications Manager and Cisco Unified Communications Manager Express Release, as listed in Table 5.

**Table 5.** Cisco Unified IP Phone Expansion Module 7915 Button Support

Call-Control Release	Total Number of Buttons Supported	
	Cisco Unified IP Phone 7962G and 7965G Models	Cisco Unified IP Phone 7975G
Cisco Unified Communications Manager 4.2(3)SR3a, 4.3(2), 5.1(3)b, and 6.1(1)	42	42
Future Cisco Unified Communications Manager Releases	54	56
Cisco Unified Communications Manager Express 4.1 and 4.2 *	34	36
Cisco Unified Communications Manager Express 4.3 and later	54	56

\* Cisco Unified Communications Manager Express Releases 4.1 and 4.2 configure the Cisco Unified IP Phone Expansion Module 7915 as a Cisco Unified IP Phone Expansion Module 7914.

## Hardware Requirements

- Cisco Unified IP Phone 7962G, 7965G, and 7975G models
- Cisco Unified IP Phone Expansion Module 7915 (CP-7915=)
  - The maximum is two modules (connecting cable supplied with each Cisco Unified IP Phone Expansion Module 7915)
- Footstand is required; single (CP-SINGLFOOTSTAND=) or double (CP-DOUBLFOOTSTAND=) (required items for double Cisco Unified Expansion Module installation shown in Figure 4).
  - Replacement of the standard Cisco Unified IP phone footstand is required. The standard footstand is replaced with a two-piece footstand specifically designed to support the Cisco Unified IP Phone Expansion Module 7915. Two footstands are available: a single footstand when one Cisco Unified IP Phone Expansion Module 7915 is used and a double footstand when two Cisco Unified IP Phone Expansion Module 7915 modules are used.
  - The only tool required for installation of the Cisco Unified IP Phone Expansion Module 7915 is a flat-blade screwdriver or other appropriate tool to unlatch the pins securing the footstand to the Cisco Unified IP Phone 7962G, 7965G, and 7975G models.
- Power cube (CP-PWR-CUBE-3=) and cord (CP-PWR-CORD-xx=) to supply local power

Table 6 gives power options for the Cisco Unified IP Phone Expansion Module 7915.

**Figure 4.** Required Items for Double Cisco Unified IP Phone Expansion Module Installation

**Table 6.** Power Requirements

Number of Cisco Unified IP Phone Expansion Module 7915 Modules	Cisco Unified IP Phone 7962G, 7965G, and 7975G Models Power Source	Items to Order
1	In-line	1 Cisco Unified IP Phone Expansion Module 7915 1 single footstand 1 power cube 1 country cord
1	Local power (cube) *	1 Cisco Unified IP Phone Expansion Module 7915 1 single footstand
2	In-line or local **	2 Cisco Unified IP Phone Expansion Module 7915s 1 double footstand 1 power cube 1 country cord

\* A single Cisco Unified IP Phone Expansion Module 7915 can receive power from a locally powered Cisco Unified IP phone.

\*\* Local power must be connected to the first Cisco Unified IP Phone Expansion Module 7915 to supply power to both Cisco Unified IP Phone Expansion Module 7915 modules.

Tables 7 and 8 give specifications and temperature ratings, respectively, for the Cisco Unified IP Phone Expansion Module 7915.

**Table 7.** Cisco Unified IP Phone Expansion Module 7915 Technical Specifications

Specification	Description
<b>Dimensions (H x W x D)</b>	8.0 x 4.84 x 2.0 in. (203 x 123 x 51 mm)
<b>Weight</b>	0.83 lb (376 g)
<b>Power</b>	48 VDC, 64 mA maximum

**Table 8.** Temperature Ratings

Temperature Variable	Description
----------------------	-------------

<b>Operating temperature</b>	32 to 104°F (0 to 40°C)
<b>Relative humidity</b>	10 to 95%
<b>Storage temperature</b>	12 to 140°F (–10 to 60°C)

## Certifications-Compliance and Safety

## Ordering Information

To place an order, visit the [Cisco Ordering Home Page](#) and refer to Tables 9 and 10. To download software, visit the [Cisco Software Center](#).

**Table 9.** Ordering Information

Product Number	Description
<b>CP-7915=</b>	Cisco Unified IP Phone Expansion 7915 Module
<b>CP-SINGLFOOTSTAND=</b>	Single module footstand
<b>CP-DOUBLFOOTSTAND=</b>	Double module footstand
<b>CP-PWR-CUBE-3=</b>	Cisco Unified IP Phone Power Cube
<b>CP-PWR-CORD-xx=</b>	Cisco Unified IP Phone Power Cube Country Cord

**Table 10.** Ordering Information – AC Country Power Cords

Product Number	Description
<b>CP-PWR-CORD-AP=</b>	Asia Pacific
<b>CP-PWR-CORD-AR=</b>	Argentina
<b>CP-PWR-CORD-AU=</b>	Australia
<b>CP-PWR-CORD-CE=</b>	European Community
<b>CP-PWR-CORD-CN=</b>	China
<b>CP-PWR-CORD-JP=</b>	Japan
<b>CP-PWR-CORD-NA=</b>	North America
<b>CP-PWR-CORD-SW=</b>	Switzerland
<b>CP-PWR-CORD-UK=</b>	United Kingdom

## Warranty

Cisco Unified IP phones are covered by a Cisco standard 1-year replacement warranty.
